PROFESSIONAL SUMMARY

B.Tech Computer Science undergraduate with 1+ year building full-stack web applications and cloud-integrated AI platforms, shipping 2 production systems. Seeking a software engineering internship to contribute to scalable, reliable systems.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, HTML5, CSS3, SQL

Frameworks & Libraries: Next.js, React,

Tools & Platforms: VS Code, Git, GitHub, MySQL, MongoDB, Supabase

Core CS Concepts: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

PROFESSIONAL EXPERIENCE

➤ Web Development Intern | Cognifyz Technologies Remote | Feb 2026 – Mar 2026

- Delivered 4 responsive web modules in HTML5, CSS3, and JavaScript across Chrome, Firefox, Safari, and Edge.
- Increased cross-browser consistency by implementing systematic QA testing, eliminating rendering discrepancies on 3 major browsers.
- Improved page load speed by 30% by refactoring CSS using Flexbox and Grid, replacing outdated float-based layouts.
- Submitted 15+ pull requests in an Agile scrum workflow, integrating peer feedback to meet every sprint deadline.

PROJECTS

➤ Resonance – Open-Source AI Voice Platform | Next.js, React, tRPC, Prisma, Cloudflare, Modal Jan – Mar 2026

- Built an open-source voice AI platform with zero-shot voice cloning via GPU inference on Modal.
- Reduced user onboarding time by **99%** – from 3+ hours to under 60 seconds – through automated voice synthesis.
- Cut TTS audio generation latency by **62%** using async job queuing and GPU-side batching.
- Reduced cloud storage costs by **~70%** migrating from AWS S3 to Cloudflare R2 with sub-100ms signed URL delivery.
- Eliminated runtime type errors across 100% of API routes using tRPC and Prisma ORM for end-to-end type safety.

➤ Meet.AI – AI-Powered Video Conferencing Platform | Next.js, React, OpenAI, PostgreSQL, tRPC Oct – Dec 2025

- Built a real-time video conferencing platform supporting **1,000+ concurrent users** at 99.8% uptime using Stream Video SDK.
- Embedded AI agents into live meetings using Next.js server components, enabling real-time assistance during calls.
- Integrated OpenAI API to auto-generate transcripts and summaries, saving 70% of documentation time for 300+ users.
- Designed a distributed backend with tRPC and DrizzleORM on PostgreSQL, handling **5,000+ meetings** at sub-100ms p99 latency.
- Implemented subscription billing and secure authentication via Polar and Better Auth, processing 200+ paid accounts.

CERTIFICATIONS & ACHIEVEMENTS

Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate | Oracle University Oct 2025

- Validated proficiency in cloud-native AI/ML services, generative AI fundamentals, and OCI architecture on an industry-recognized credential platform.

GenAI Powered Data Analytics Job Simulation | Tata Group via Forage Sep 2025

- Completed hands-on simulation encompassing AI-driven delinquency prediction, exploratory risk profiling, and data storytelling for enterprise collections strategy.

YUVA AI For All | TCS iON · IndiaAI Government Initiative Feb 2026

- Completed a government-backed AI literacy program covering machine learning paradigms, responsible AI deployment, and real-world use-case implementation.

TCS iON Career Edge – Young Professional | Tata Consultancy Services Feb 2026

- Acquired corporate-readiness competencies spanning business communication, professional etiquette, IT foundations, and an overview of artificial intelligence applications.

EDUCATION

➤ <u>Dronacharya Group of Institutions</u>	<u>Greater Noida, India</u>
Bachelor of Technology in Computer Science and Engineering	<u>2023 – 2027</u>
➤ <u>The Divine Public School</u>	
Class XII, CBSE	<u>72%</u> <u>2022</u>
➤ <u>Mother Teresa School</u>	
Class X, CBSE	<u>68.6%</u> <u>2020</u>
